

(a) Translator prompt

Role

You are given Python code that solves an algorithmic problem. Explain how to solve it in natural reasoning.

Style guidelines

- Think aloud, exploratory, with checks.
- Use phrases like 'let me check...'.- Avoid line-by-line execution traces.

Output

REASONING: [natural-language explanation]

(b) Judge prompt

Role

You are analyzing an explanation of how to solve an algorithmic problem.

Task

Decide whether the explanation was written by someone solving the problem naturally (NATIVE) or by translating code execution into natural language (TRANSLATED).

Output format

PREDICTION: [NATIVE | TRANSLATED]

CONFIDENCE: [HIGH | MEDIUM | LOW]

REASONING: [1–2 sentence justification]
